summary

...and the best tools

PS3D

Your 3D stand design software that allows you to make renderings and estimates for all our products in just a few clicks.

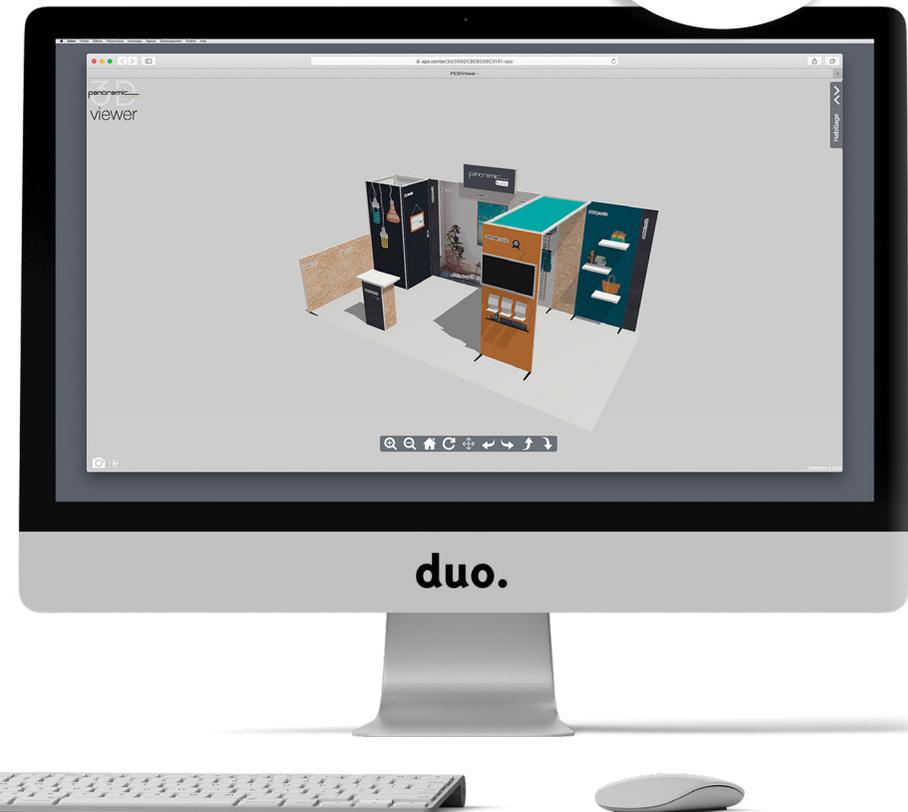

With the 3D Viewer extension, see your project online and share it with all collaborators thanks to a unique web link.

XPO.CENTER

Your personalized and secure file management portal, accessible 24/7. It allows you to access your current or past orders, as well as a summary view of your order status.

With xpo.center, upload your files, then generate and approve your e-proofs in just a few clicks.

Our expertise in dye-sublimation printing on fabric to enhance your communication

- Why choose fabric graphics?

Fabric graphics are very well-suited for use in the exhibit and events industries. They are easy to transport, handle and set up; they are scratch-resistant, wrinkle-free and washable, and may even be dry-cleaned.

They offer unrivaled aesthetic rendering with the best colour execution that won't fade over time.

- What is dye-sublimation printing?

Sublimation is a physical phenomenon by which matter passes directly from a solid to a gas. The fabric's fibers are dyed directly, which improves colour resistance over time.

- Benefits of this technology

- Unrivaled quality: dye-sub printing offers exceptional contrast, intensity and depth. Colors are vibrant and available in a wide range, including at high density.
- Anti-reflective: dye-sublimated fabric absorbs light and prevents reflections from appearing on your image.
- More eco-friendly process: the inks used are aqueous solutions that are solvent-free and odorless.

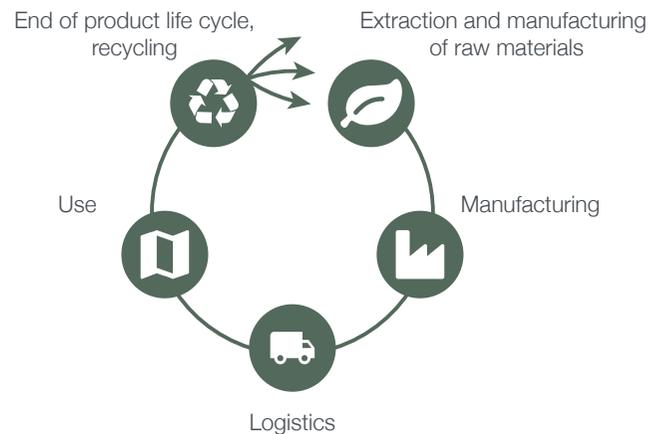

Our environmental approach guarantees you the most eco-friendly products

Throughout the entire life cycle of our products, we implement concrete actions with our network to minimize environmental impact.

Our eco-responsible approach takes the form of five commitments that are carried out throughout the entire life cycle of our products:

- 1 Opt to use recyclable, recycled, biodegradable or repairable raw materials and finished products whenever possible. Ensure that only the essential elements for desired features are used, i.e. no unnecessary parts.
- 2 Minimize the impact of manufacturing on the environment by using more eco-friendly machinery and optimizing the production process. Notably, our 1158 solar panels (2252 square meters) installed on the rooftop of our factory in France allow us produce 313 MW per year (for lower consumption: 301).
- 3 Reduce environmental impact with local production and distribution facilities. We produce and store next to the exhibition places (3 production facilities worldwide: France - Germany - Canada ; and logistics centers close to major cities)
- 4 Encourage the reuse of our solutions. All of our frames can be used for several events.
- 5 Oversee the recycling of raw materials and final products, or the transformation of non-recycled graphics into objects. For example, aluminum is systematically recycled, and we have created partnerships with local charitable associations to reuse graphics as textiles.

An environmental approach implemented throughout the entire life cycle of our products

Reuse of a stand graphic as a decorative wall frame

Production takes place locally, in France and across Europe, to limit the environmental impact of transport. Overall, we strive to integrate eco-friendly actions into our day-to-day activities and at every level.

New products

Recycled fabric: from plastic bottles to a printed graphic

We offer graphics made from recycled fabric sourced from plastic bottles for all your retractables and banner stands.

(see page 35)

one.

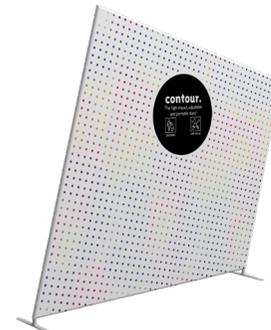

1 new size (see page 37)

one.R1 460

contour.

Stand out from the crowd with new contour inclined, curved and wave formats. (see page 14)

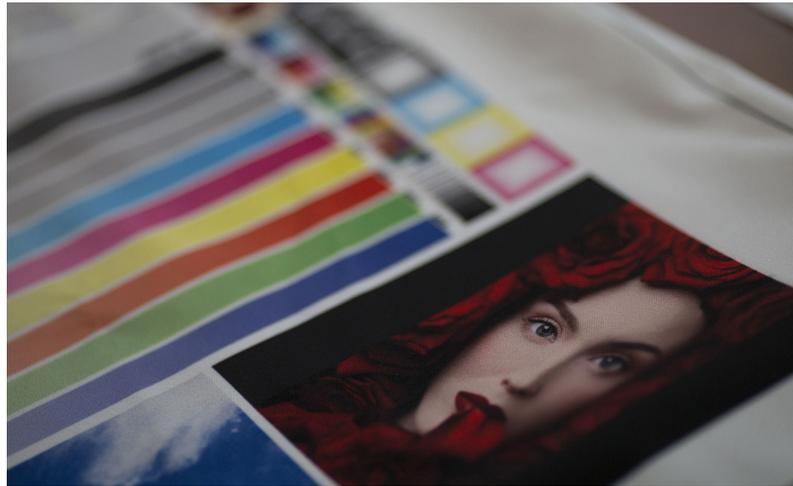

New products

All graphic finishes now available:

Dye-sub printed fabric graphics with a wide range of finishes for a variety of applications.

(see page 57)

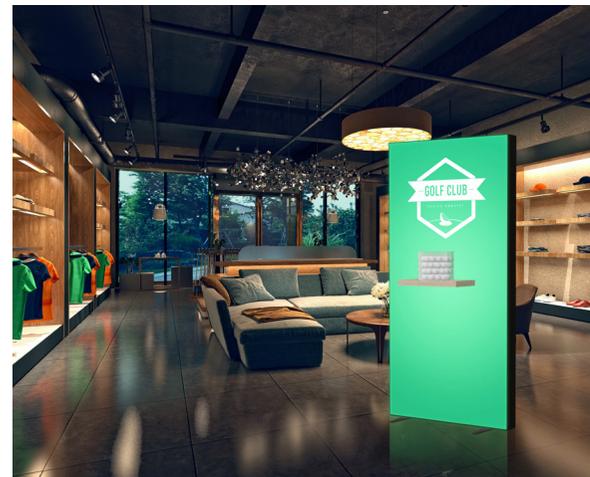

Panoramic lightbox, the “à la carte” lightbox solution:

Go one step further in customizing your lightboxes: accessories (TV, shelves), new profile colours, new opaque back graphic. (see page 46)

cover.up

It is the ideal solution for customizing bare partitions in a space ordered from your trade show organizer.

(see page 60)

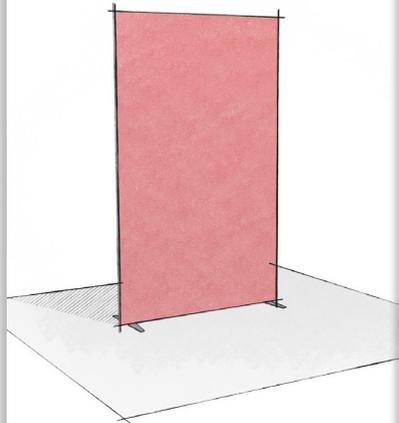

- Easy-to-transport visual solutions that are resistant, durable and easy to set up
- Pop-up stands, fabric stands, all-in-one portable kits

pop-ups & backwalls

Choose a pop-up stand or backwall solution based on what you like and need

contour.

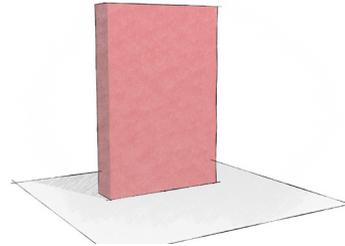

thin and changeable design

Tubular system with stretch single-sided or double-sided pillowcase graphic for those looking for a truly portable, modular and changeable exhibit solution with optional accessories. Setup time: 10 minutes.

best seller

xtension.

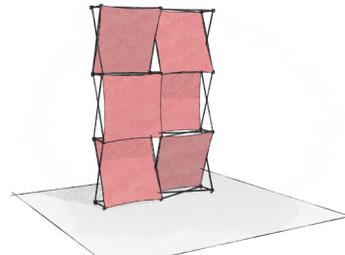

The very lightweight fabric pop-up display that's super easy to setup and has exceptional colour rendering.

Available in 2x3, 3x3 and 4x3.

Setup time: 30 sec.

best seller

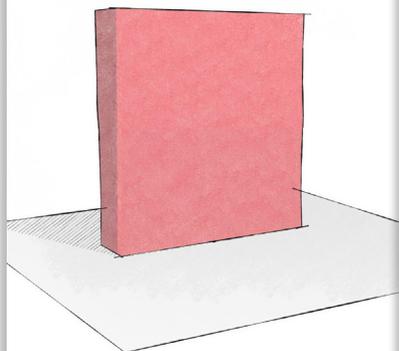

xpressions.

Ultra-lightweight pop-up covered with multiple fabric graphics so you can easily change your message. Available in the hello.xpress all-in-one trade show kit. Setup time: 30 sec.

best seller

xperience.

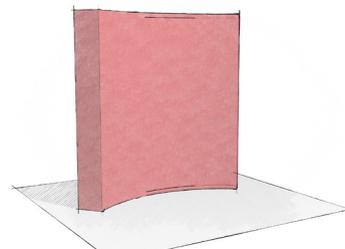

modular stand finish (silicone edge)

Pop-up structure with channel bars in which silicone edged graphics are installed for a perfect finish. Available in the following versions: straight (including very large formats), curved, backlit and counter.

Accessory-compatible (TV, lights, shelves, etc.) Setup time: 10 min.

virage.

The fabric pop-up display with a curved design.

Available in 3x3 and 4x3.

Setup time: 60 sec.

xperience, the fabric pop-up with infinite possibilities

- The silicone edge fabric graphic (SEG) slips into the channel bars for a perfectly taut graphic with guaranteed graphic impact
- The frame unfolds in seconds, the bars attach to the hubs, and the graphic is inserted into the groove
- Compact solution: transport it in a carried or wheeled bag
- The xperience bonus: multiple options available, including large format, curved, backlit and counter versions
- Accessories: TV, LED light. Frames may be connected to one another
- New "anti-fracture" corner brackets: more resistant, easier to assemble and disassemble.

- Prints up to 3m wide

decorations & furnishings

Lightbox, for even more impact

single-sided or double side profile

LEDs integrated into the profile

perfect corners

- Even light diffusion: unbeatable colour rendering using dye-sublimation printing on fabric
- Environmentally-friendly: LED lighting system uses low amounts of electricity
- Suited for standion, event and store displays
- Integrates perfectly into panoramic stands
- Different finishes available for profiles: standard anodized gray, white available upon request
- Available in single-sided and double-sided options, with your choice of profile colour: anodized gray or lacquered white (standard), matte black, sunshine yellow, tangerine orange, blood red, pacific blue, Montpellier blue, apple green (options)
- Optional attachable accessories: TV or shelve. Graphic reverse side options: backlit / printed opaque / white / black

Create a fully immersive environment for your customers with our lightbox frames

wall.frame, small to very large format wall-mounted frames

- High-definition design and quality: the frame is so thin that you can't see it. The graphic is held tight and the colour rendering is unbeatable because of its printed on the fabric using dye-sublimation
- Both rounded or right-angled corners available to adapt to all uses.
- Ultra-light frame, easy to change graphics that attach with silicone edges
- You don't need any tools to assemble the frame

Available in custom dimensions

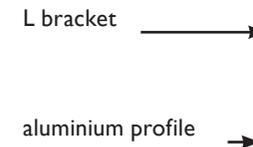

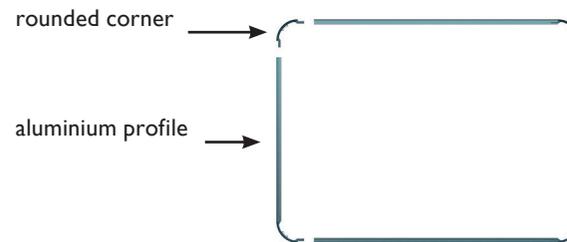

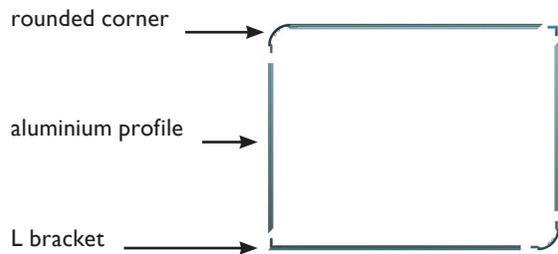

wall.frame Teardrop
(2 rounded corners + 2 right-angle corners)
Structure + graphic + packaging*

wall.frame Contour
(4 rounded corners)
Structure + graphic + packaging*

wall.frame Classic
(4 right-angle corners)
Structure + graphic + packaging*

*Prices based on ECOFRAME fabric – Includes cardboard packaging. Discounts apply for graphics measuring 50m² or larger.

Graphics that adapt to your projects

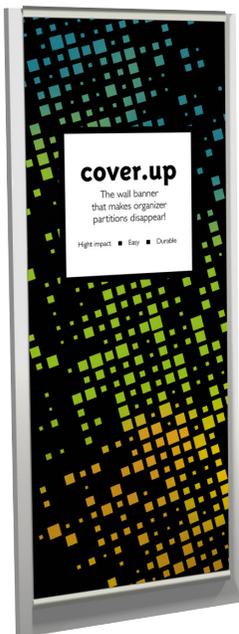

cover.up, the wall banner that makes organizer partitions disappear!

- Effective communication: utilize all space provided by partitions while creating an aesthetic and high-quality effect.
- The aluminum profile hangs to all partitions and enables to attach large format graphics.
- Long-lasting solution: At the end of your trade show, take down cover.up and return the partitions from your booth in perfect condition. You can re-use it for future events.
- This compact and lightweight solution may be transported anywhere thanks to its wheeled transport bag.
