summary

Our purpose: create, design and build stands that meet your needs

- Are you looking for unique, high-impact stand solutions?

All of our solutions are created to put the spotlight on your message.

The structures, textiles and printing techniques have been developed conjointly. The results: high quality and exceptional impact that helps showcase your image.

The endless combinations possible between panels and accessories ensure that your stand is unique.

- Are you an agile company looking for solutions tailored to your own pace?

A company stands 5 times a year* on average. This is why we design changeable, modular and reconfigurable stands with endless possibilities.

A range of optional accessories are also available to make them even more functional.

Our environmental approach guarantees you the most eco-friendly products

Throughout the entire life cycle of our products, we implement concrete actions with our network to minimize environmental impact.

Our eco-responsible approach takes the form of five commitments that are carried out throughout the entire life cycle of our products:

- 1 Opt to use recyclable, recycled, biodegradable or reparable (i.e. no definitive assembly) raw materials and finished products whenever possible. Ensure that only the essential elements for desired features are used, i.e. no unnecessary parts.
- 2 Minimize the impact of manufacturing on the environment by using more eco-friendly machinery and optimizing the production process. Notably, our 1158 solar panels (2252 square meters) installed on the rooftop of our factory in France allow us produce 313 MW per year (for lower consumption: 301).
- 3 Reduce environmental impact with local production and distribution centers. We produce and store next to the exhibition places (3 production facilities worldwide: France - Germany - Canada ; and logistics centers close to major cities)
- 4 Encourage the reuse of our solutions. All of our frames can be used for several events.
- 5 Oversee the recycling of raw materials and final products, or the transformation of non-recycled graphics into objects. For example, aluminum is systematically recycled, and we have created partnerships with local charitable associations to reuse graphics as textiles.

An environmental approach implemented throughout the entire life cycle of our products

Reuse of a stand graphic as a decorative wall frame

Production takes place locally, in France and across Europe, to limit the environmental impact of transport. Overall, we strive to integrate eco-friendly actions into our day-to-day activities and at every level.

Our turnkey offering

Services included for each stand.

STAND DESIGN

Your personalized solution, designed and quoted in 5 days and a viewer link that gives you a 360-degree visualization of your stand online.

FILE MANAGEMENT

An online portal for real time tracking of your order.

MADE LOCALLY

Manufactured and finished by our production facilities, located in France, Germany and Canada.

QUALITY CONTROL

100% of our stands are inspected by our experts.

Our additional services

GRAPHIC CREATION

that boosts your image.

OPTIMIZED LOGISTICS SERVICES

to provide you with the best experience.

STAND INTER- NATIONALLY

thanks to an international network of assemblers available for set-up and dismantle.

STAND RENTALS

a smart economical solution for your occasional needs. A solution tailored to multimedia and LED video walls.

STORAGE SERVICES

for your stands.

Our tools to assist you

PS3D

Your 3D stand design software that allows you to make renderings and estimates for all our products in just a few clicks.

With the viewer extension, see your project online and share it with all collaborators thanks to a unique weblink.

XPO.CENTER

Your personalized and secure file management portal, accessible 24/7. It allows you to access your current or past orders, as well as a summary view of your order status.

With xpo.center, upload your files, then generate and approve your e-proofs in just a few clicks.

Our expertise in dye-sublimation printing on fabric to enhance your communication

- Why choose fabric graphics?

Fabric graphics are very well-suited for use in the exhibit and event industries. They are easy to transport, handle and set up; they are scratch-resistant, wrinkle-free and washable, and may even be dry-cleaned.

They offer unrivaled aesthetic rendering with the best color execution that won't fade over time.

- What is dye-sublimation printing?

Sublimation is a physical phenomenon by which matter passes directly from a solid to a gas. The fabric's fibers are dyed directly, which improves color resistance over time.

- Benefits of this technology

- Unrivaled quality: dye-sub printing offers exceptional contrast, intensity and depth. Colors are vibrant and available in a wide range, including at high density.
- Anti-reflective: dye-sublimated fabric absorbs light and prevents reflections from appearing on your image.
- More eco-friendly process: the inks used are aqueous solutions that are solvent-free and odorless.

Innovations

Panoramic h-line Lightbox (4 cm)

Thinner, more modular for even more creative possibilities!

Signature spotlight

A more design-focused and higher-performance lighting solution. (see page 72)

New panoramic h-line transparent modules

Combine 4 transparent partition models to allow light to pass through while remaining hygienic.

contour

Stand out from the crowd with new contour inclined, curved and wave formats. (see page 18)

Innovations

Panoramic lightbox

Accessories, profile colours and new printed reverse side options for a 100% customized lightbox.

New h-line TV mount for TVs up to 65"

Broadcast your message on bigger screens.

Backlit hanging signs

Communicate with height and light. (see page 71)

Innovation

Create custom video walls using panoLED LED panels

The thinnest and most lightweight panel

Crisp images and vibrant colours

Preinstalled connectors for easy assembly

- panoLED lets you create modular video walls by quickly assembling 48 cm x 48 cm panels.
- panoLED lets you innovate and bring your stands to life: reveal the beauty of your content with vibrant colours, spectacular images and a totally new visual experience.
- panoLED offers easy and ultra-secure attachment through the use of preinstalled h-line connectors.
- panoLED is designed to integrate with Panoramic h-line and c-line modular systems, and with conventional stands.
- A silicone edge graphic can be fitted to the reverse side of the panel thanks to a patented innovation (patent pending).
- panoLED allows for applications that go beyond stands: whether hanging, standing or integrated into a design, the applications are endless.

Small foldable counter display case with 2 shelves and 8 transparent panels

Dimensions
Ø580mm x H 1060mm

Stand out from the crowd with a personalized, high-impact stand.

Our stand solutions, especially those from the panoramic line, are designed to highlight printed images. Here are a few creative tips to maximize your visual effectiveness.

- Opt for an immersive design

Optical illusion effects, textures, high-resolution and large-format graphics, graphic personalization of the entire surface including the floor...these are just some of the ways you can immerse your visitor in your stand's environment.

- Focus on a simple graphic and a unique message

Trade show visitors have less than 30 seconds of attention to give you when they pass by your stand. The easiest message for them to understand is a simple message set against a sleek graphic background. Try to avoid using too many messages, colors or effects, as impact is created through simplicity.

- Combine continuous design with modularity

Your modular stand will evolve as you attend various trade shows and share different messages. The languages of your event may even vary. Don't hesitate to adapt its design as necessary. We guarantee perfect graphic continuity, even if your stand is sectioned into panels.

To create your graphics, please refer to the provided templates to create the appropriate files, and contact our project management team at the start of your project. You will then be guided through our xpo.center file management platform.

Four reasons to attend a trade show

- Meet decision-makers

According to Exhibit Surveys, in 2010, 80% of trade show visitors had "the power to recommend or make final purchase decisions". In addition, 31% of visitors claimed that "their purchase intention was stronger after visiting the trade show".

- Improve sales productivity

According to the French Statistical Audit Bureau for General and Specialised Fairs and Exhibitions (OJS), customer contact at a trade show is "four to ten times less expensive than a customer visit". Contact cost for a stand averages at about 20 \$, whereas this contact ranges from 80 à 200 \$ when made during field visits. Furthermore, a sales rep will meet with 15 customers daily at a trade show vs. an average of three customers during a field visit.

- Explore prospects

Trade shows hold a wealth of opportunities and present many "hot" receptive prospects because visitors attend shows on their own accord. This makes it an incredibly effective way for exhibitors to expand their customer base

- Communicate with the press and opinion leaders

Tips & Tricks for a Successful Trade show

Before the show

- Create a budget and set goals

Trade show participation is part of a company's overall strategy, as well as its marketing, sales and HR strategies. It is very important to set specific goals and create a budget that includes purchasing of space, a stand, as well as personnel costs (travel, hotels, restaurants). It is essential to create a system for gauging the success of each trade show.

- Select trade shows that your company wants to attend, then choose your placement and area size

A countless array of events exist, ranging from major international trade shows to local conventions. It is important that each trade show you attend corresponds to your company's challenges in terms of business. Many companies now prefer to attend local trade shows with small exhibit areas as they offer more returns on investment.

Trade show organizers often offer pre-registration discounts, so it is best to reserve exhibit space in advance. Placement is also a very important factor.

Opt for placement near the entrance, in the main aisles or near "locomotives" (leading companies that attract visitors).

- Seek assistance of trade show display and visual communication professionals

Exhibits and event planning are very specific fields and require experience. Seek the advice of professionals, and do not hesitate to ask your service provider questions on how to set up your stand and who will be involved. You may also request references and contact them.

- Create a brief for trade show display professionals

Clearly explain your objectives and your strategy. Several constraints may influence your trade show display specialist's recommendations, which can help you cut costs significantly.

What type of stand should you choose? We have divided stands into three categories based on their weight, volume and assembly time/difficulty. The categories are: ultra-portable, portable and transportable. All ultra-portable and portable solutions may be set up and dismantled by exhibitors without any professional assistance. Some transportable stands also have the "Do it yourself" label.

How many times will you use your stand? If you will only use your stand once, opt for a rental. If you will reuse it several times, specify the various spaces where it will be used and your desired configurations. It is possible to start with a modular system that uses shared elements, which will allow you to create exhibits ranging in a wide variety of sizes.

Which features do you need? Reception counters, storage, product displays, videos, customer meetings, brochure distribution.... these are all features that influence how your stand is designed.

- Invite your customers and prospective customers

Trade show organizers provide free passes and distribute newsletters, which will allow you to easily inform your customers about your participation.

Sales teams can also increase their scope of action by meeting with customers before and after the trade show for breakfast or dinner.

Remember that these times are just as effective as field visits.

During the trade show

- **Details make the difference**

Your stand is a reflection of your company's image. Make sure it is organized! A storage area is very useful for concealing packaging or for storing brochures. Portable solutions come with a carrying case that turns into a counter, and modular solutions offer storage areas that are secured by a door. Lighting is very important as it puts the spotlight on your message. Environmentally-friendly LED solutions help conserve electricity.

- **Brief your teams every morning**

Your team should be informed about your new products and services.

A daily morning meeting before the show opens is a way to re-specify goals and answer questions that were asked the night before.

- **Create buzz around your stand**

To capture visitors' interest, create buzz around your stand with training sessions, wine & cheese samplings and other attention-drawing events.

After the trade show

- **Follow-up is the key to success**

A successful trade show is not just about meeting with customers and leads: Ensure that each lead has been addressed and a follow-up goal is established. Thank your customers after the trade show and follow up on each request individually. Ensure that each lead has been processed with an objective follow-up. You will then be able to gauge the show's success and decide whether or not you will attend it again in the future.

- **Reuse graphics after the trade show**

Exhibition systems like Panoramic allow you to use portions of your graphics, which can be cut or re-sewn.

The single-sided frame can be mounted on a wall, and the double-sided frame lets you create fabric backwalls, which are like mini-exhibition kits.
