Function meets style

Customize your acoustic frame

Advantages of dye-sub printing

- Unequaled print result: intense colors, good contrast and no reflexions
- Sustainable printing process: printing inks are water based without solvents or smell
- Visuals can be changed tool- and effortless by the user: change the look and feel as often as you like.

High quality fabric material

5

Every room is unique, Fabacoustic is made to measure

Fabacoustic frames are made to measure for a perfect fit.

As a rule of thumb, install a surface of about 1/3 of the floorspace for a good acoustic performance.

So, for a room of 36m², install about 12m² of Fabacoustic.

Individual design

Restaurant

“Enjoy your meal! In a pleasant and design interior”

7

Offices
