

FLAG STAND SET-UP INSTRUCTIONS

Kit Contents

1 flat plate stand	1 pole base	4 feet – A	4 small round-head screws – B	4 nuts – C	4 large round-head screws - D	4 spare flat-head screws	2 Allen wrenches	1 flat wrench
								

Set-up

1. Attach the four feet (A) to the plate stand with the small **round-head** screws (B). Use the black Allen wrench.
2. Attach the pole base to the plate stand with the large **round-head screws** (D) and the nuts (C), placing the base of the nut against the plate stand. Tighten the screws using the Allen wrench, while holding the nuts in place with the flat wrench.
